

EPKT Scenery

Katowice-Pyrzowice Airport Scenery for X-Plane 10

Licence

EPKT Scenery is for personal, non-commercial use only.
Redistributing the Scenery or any part of it is prohibited.
For further information, please feel free to contact me.

Installation

If you have ever installed an additional scenery, the installation should be easy for you. Otherwise if it is your first time, follow steps.

First step

- Extract all folders (EPKT, Custom Data) from downloaded archive.

Second step - adding scenery files

- Put the EPKT folder into Custom Scenery folder (located in main X-Plane folder).

Third step - adding navigation files

- Open downloaded Custom Data folder (contains: `earth_nav.dat`, `earth_fix.dat`, `EPKT.txt`).
- Open default Custom Data folder (located in main X-Plane folder).
- Now, you have two possibilities:
 - If you don't have files in the default Custom Data folder yet - you should put `earth_nav.dat` and `earth_fix.dat` into this folder.
 - If you have already `earth_nav.dat` and `earth_fix.dat` files - edit* `EPKT.txt` file and:
 - copy the first part (with "FIX" header) and paste to `earth_fix.dat`,
 - copy the second part (with "NAV" header) and paste to `earth_nav.dat`.

**Windows users: use Wordpad, Notepad++ or Sublime instead of Notepad.*

That's all! Have a nice flight!
